## Customized Energy Solutions to Meet your Business Needs

**F**or over 25 years, South Jersey Energy has played an integral role in the success of South Jersey Energy Solutions – the lead subsidiary of South Jersey Industries’ non-regulated businesses. As a long-standing supplier of natural gas and power, we have helped thousands of businesses benefit from energy solutions tailored around their company’s specific needs and budget.

### ENERGY MANAGEMENT

At SJE, we realize business owners have little time to create and monitor an effective energy plan. That’s why we offer custom-fit energy solutions that help businesses control energy costs and improve their energy management. Each customer is partnered with an Energy Advocate who provides knowledgeable, unbiased guidance that helps them choose the right energy plan for their business.

You can count on our Energy Advocates to:

- Guide and advise you on commercial and industrial energy services and trends

- Recommend and implement custom industrial and commercial energy solutions regardless of the size of your business
- Offer side-by-side comparisons and projections on all competitor offers, helping you decipher the fine print
- Always be available for face-to-face meetings – he or she isn’t just a voice over the phone
- Provide you with a personal cell phone number for 24/7 access and service

### ENERGY EFFICIENCY

Upgrading to high-efficiency energy equipment and systems can significantly reduce a business’s operating costs. SJE offers services to help with implementing energy efficiency projects such as green lighting solutions and HVAC retrofits, as well assist with navigating rebate programs offered by the state. We are proud to be a designated contractor of New Jersey’s Clean Energy Direct Install Program. **PS**
