## Trusted, Experienced, Dedicated & Invested

**T**rusted, experienced, dedicated & invested are words that characterize AT&T's heritage and partnership with first responders and public safety organizations in New Jersey and nationwide to respond rapidly to emergencies and meet their mission.

For more than 100 years, AT&T has been investing in, developing and delivering technological innovations – ranging from network resilience & security, mission critical solution capabilities, to emergency and disaster preparedness. Our high-speed 4G LTE broadband network can scale up and down on-demand, and we have public safety solutions that are agile, flexible & reliable.

Our innovation programs lead to new technologies, solutions and services, including Internet of Things (IoT) solutions solving tough issues, market challenges, and improving lives at home and at work.

To meet these critical goals, AT&T invested more than \$1.55 billion in its New Jersey wireless and wired networks during 2013-2015. These investments drive a wide range of upgrades to reliability, coverage, speed and overall performance for our customers. And, the investments enhance critical services that support public safety and first responders.

In fact, nationwide, from 2010 through 2015, AT&T invested more in the US than any other public company, and again this year topped the Progressive Policy Institute's (PPI) list of Investment Heroes.

"We're committed to providing our customers with fast, reliable, highly secure connectivity. We want them to be able to access the Internet at any moment, from almost any device and anywhere," said J. Michael Schweder, Mid-Atlantic President, AT&T. "Our continued investment in New Jersey brings a host of new, innovative opportunities for residents and businesses – and for our first responders across the Garden State."

In 2016, for the second year in a row, *Fortune* magazine recognized AT&T as the "Most Admired Telecommunications Company" in the world. The company also placed #48 among the "Top 50 World's Most Admired" companies. This is its third year in a row on the Top 50 list – AT&T is the only communications company on the list. It ranked #1 in all 9 attributes. This included innovation, financial soundness and quality of products/services. *Fortune's* "Most Admired Companies" lists are among the most highly respected indicators of corporate performance and reputation.
