Your Payment Technology & Merchant Services Partner

New Jersey Business & Industry Association's (NJBIA) premier payment technology partner, Priority Payments Local, offers highly scalable and flexible payment technologies built to meet merchants' complex needs.

"We've simplified the decentralized merchant acquiring landscape by offering a diverse portfolio of products and solutions that are exceptionally responsive to market needs – all available within a single, easy-to-access merchant marketplace," said Chief Operating Officer and Co-Owner, Angelo Mendola.

"Our single source merchant solutions and distribution partners deliver STRONGER core processing, SMARTER consumer engagement, and FASTER funding options – all designed to deliver more effective, powerful, convenient, and secure ways to manage and grow your business."

In 2016, Priority teamed up with NJBIA to offer members exclusive low rates on their card processing. Since then, Priority has been able to save members between 25 and 50 percent on their card processing and takes pride in helping merchants. To learn more about Priority and how much money you could be saving on your card processing, call 800-717-1250 or send an email to NJBIA@PPLOCAL.COM.

Pictured: MX Merchant is one of the most powerful payments platforms available and is a payments ecosystem that goes far beyond a traditional gateway. It comes standard with your merchant account and includes these robust features: Dashboard, Virtual Terminal, Payments & Batches, Reporting, Customers, and Settings. NJBIA Members get MX Merchant for FREE when they process cards with Priority.
