## Rowan University Means Business

**R**owan University doesn't just teach business, it invests in it. The highly ranked University has a history of preparing students to enter accounting, finance, human resources, marketing, entrepreneurship and other fields.

The nationally recognized research institution also has a history of partnering with small and large business, industry, government and non-profit organizations on projects critical to their success.

That can entail providing a qualified intern for a Big Four office, preparing an IT graduate to shepherd a start-up in the Garden State or building a professor-student team to tackle pressing issues and relieve pressure on in-house staff at a Fortune 500 firm.

The University does this in diverse disciplines, from business to engineering to communication to healthcare. Potential partners can draw from a pool of more than 19,400 students, students taught and mentored by professors who are leaders in their fields.

These teams are part of undergraduate, master's, doctoral and medical programs on campuses in Glassboro, Camden and Stratford, New Jersey.

Rowan University, home to Cooper Medical School of Rowan University and the School of Osteopathic Medicine, is one of only three universities in the nation to grant both M.D. and D.O. medical degrees. In addition, Rowan is comprised of the William G. Rohrer College of Business; the Henry M. Rowan College of Engineering; the colleges of Communication & Creative Arts; Education; Humanities & Social Sciences; Performing Arts; and Science & Mathematics; the School of Health Professions; the School of Earth & Environment; and the Graduate School of Biomedical Sciences. Rowan also includes the South Jersey Technology Park and the Jean and Ric Edelman Fossil Park, and is collaborating with regional leaders to create research and academic programs in health sciences.
