Building Connections in the IT Community

This year for Domain Computer Services has been one of thriving excellence and growth. To begin the year, we became the first IT establishment to launch an apprenticeship program for local college students studying in the field of IT. This allows them to be compensated for their work while gaining the accreditation with the experience of actually working in the IT field, and providing our growing team with energized and new resources.

We also have continued to make strides in our community by hosting events to get to know our local business leaders. In August, we were happy to host a networking event for like-minded individuals at Topgolf, where business professionals got to connect with others while taking a swing in the open field. In the fall, we are set to host another event at our local bowling alley. If you are interested in joining us in the future, give us a call. We welcome all business professionals looking to make connections in the community.

Anthony DeGraw, Director of Partnerships, recently took the lead in launching our very own podcast, "Discussions by Domain," dedicated to helping business leaders in the northeast connect with experts in their backyard. You can find all of our past episodes on our website at https://www.go-domain.com/podcast/ and follow us on Facebook and LinkedIn for updates.

We're an IT company, but we're far more than that – Domain is an ultra-adaptable team that goes beyond the technology aspect of IT to become an integral piece of the success of businesses in New Jersey and the greater New York and Philadelphia Metro Areas.

Come join us for a Friday lunch with our team, and keep up to date with our future events by following us at DomainCS on Facebook and Domain Computer Services on LinkedIn.
