SJI: Make Every Day a Safe Day

SJI provides safe, reliable, affordable energy services to nearly 700,000 customers statewide through three primary subsidiaries: SJI Utilities, South Jersey Energy Solutions, and SJI Midstream. Serving New Jersey for more than a century, we power homes, schools, hospitals and more through our family of companies.

Through SJI Utilities, the holding company for our three regulated natural gas utilities, we provide dependable natural gas service to customers in New Jersey with South Jersey Gas and Elizabethtown Gas, and Maryland with Elkton Gas. During 2018, SJI Utilities was the second largest provider of natural gas distribution in New Jersey and third largest local gas provider in the United States, based on enterprise value.

Our non-utility businesses, South Jersey Energy Services and South Jersey Resources Group within South Jersey Energy Solutions, prioritize wholesale commodity marketing, asset optimization and fuel supply management. SJI Midstream houses our interest in the PennEast Pipeline Project.

“At SJI, we’re committed to providing safe, reliable and affordable energy, while ensuring the safety of our employees, customers and the communities we serve, and delivering value for our shareholders,” says Michael J. Renna, President & CEO, SJI.
